

A screenshot of a Python IDLE Shell window. The title bar reads "IDLE Shell 3.9.7*". The menu bar includes "File", "Edit", "Shell", "Debug", "Options", "Window", and "Help". The main text area shows the Python version and build information: "Python 3.9.7 (tags/v3.9.7:1016ef3, Aug 30 2021, 20:19:38) [MSC v.1929 64 bit (AMD64)] on win32". It then displays the prompt "Type 'help', 'copyright', 'credits' or 'license()' for more information." followed by a successful execution of the command ">>> print('Hello world')", which outputs "Hello world". The prompt ">>> " is followed by a cursor and the letter "z".

```
IDLE Shell 3.9.7*
